

Window Safety

- Lock all unopened windows
- Open windows from the top down if possible
- Keep toys and climbable furniture such as beds and sofas away from windows
- Install window stops to prevent windows from opening more than 4 inches
- Install window guards with a quick-release feature for emergencies
- Plant shrubs or place other soft material under windows to cushion potential falls
- Don't rely on screens to protect your child—screens are designed to keep bugs out, not children in
